

# BioZone New Student Application Form

---

## BioZone PhD Program

The four-year BioZone PhD program facilitates deeper engagement with, and the development of, a transdisciplinary project and skillset. Prospective applicants must identify a supervisor in an area of interest and research goals aligning with BioZone's transdisciplinary ethos. Applicants must then express interest in joining the BioZone PhD program by contacting Associate Professor Jennifer Rodger ([biozone@uwa.edu.au](mailto:biozone@uwa.edu.au)) and **attaching a copy of this completed form**.

Please note: Applicants must apply for PhD candidature and a research scholarship (<https://www.uwa.edu.au/study/Research/research-scholarships>) via mainstream pathways. Only applicants awarded a research scholarship, such as a Research Training Program (RTP) or a University Postgraduate Award (UPA), will be considered to join the BioZone program.

Successful candidates are those who obtain a scholarship (RTP, UPA or equivalent), demonstrate a genuine passion for and interest in transdisciplinary research and whose research goals align with the BioZone ethos.

## Applicant Details

Name:

Student number (if applicable):

Primary UWA School affiliation:

Proposed date of commencement:

## Scholarship Status

Please indicate your scholarship status:

Applied and awarded

Applied but waiting to hear

Haven't applied

\*If you have been awarded a scholarship, please attach confirmation to your expression of interest email.

### **Research and Personal Statement**

Provide a brief description of the proposed research clearly outlining the transdisciplinary perspectives and/or outcomes (250 words):

Provide a brief personal statement outlining your motivations for joining BioZone (250 words):
